The War Is Over

There will be no further struggle for supremacy among phonograph inventors. Thomas A. Edison has produced the perfect sound reproducing machine-THE NEW EDISON DIAMOND DISC.

The fight has been on for thirty years, but nearly two years ago it was ended once for all.

The Victory Is Complete

The Edison reproduces overtones that no other machine can reproduce. It is because of the Diamond Point automatically moved and balanced. It is wonderful. Don't you get tired changing the needles on the old style machine? Come in and see the Diamond point work.

EON MAKES REPORT ON HIGHWAY WORK

"Grading on the Columbia highway is practically completed, but the road will not be opened for travel until about May 1." said John B. Yeon, Multnomah county roadmaster, in the Sunday Oregonian.

"We have now about 1200 feet of the river steamer would leave a ton of

other.

"Tell the people of Portland and Oregon that they will be able to drive through to Cascade Locks by July 1 and that they will be privileged to go through to The Dallies by using part of the old road and part of the new. The worst place between Cascade Locks and The Dalles is Mitchell's Point, and, thanks to the generosity of Simon Benson, sontracts are now being invited for the required work at that point.

Thought it would bear the weight of the flour.

"While I was loading my flour I heard the noise of oarlocks on an approaching skiff. A young man, most gorgeously dressed, landed. He had on a flaming red necktie, a brand new suit of clothes and new boots. I understood that he was attracted here by a beautiful half breed maiden, who was working at the back water, if he had walked it would r the required work at that point.

Consequently I have decided to keep the highway blocked up until the spring is well along. By May 1 it probably will be ready for travel as far climbed up, and off we went. Every-

we will put big rollers on it and make the surface as smooth as glass. Then the highway can be used until some time in October."

face, and over the wagon went. I landed on top of him in the muddy water. I thought I would drown the man before I could get off him.

Mr. Yeon reports that the highway "I have never seen such a change in "standing" far better than expected. man. He spat the dirty water from his miliar with highway engineering. results have been satisfactorily. I value them highly." For sale by all dealers.

"We have now about 1200 feet of rock work to do at Bonneville, and it will not be long until we have finished this task. The contracts let recently for the construction of the three bridges yet to be built call for the completion of these structures by July 1. By that date the work in Hood River county will be completed partially and the two strips of road will connect with each other.

"I had received word one day that the river steamer would leave a ton of flour for me at the landing place near the present wharf of the Regulator line. I put the sideboards on my wagon and drove down across what is now known as the Button bottom. It was in May and the high water from the Columbia was backed up over the whole field. It was 18 inches deep in places, but the road seemed hard, and I thought it would bear the weight of the
